

093 E-Z Strip® Vinyl Expansion Control Joint

gripSTIK® 093 E-Z Strip® Expansion Control Joint is designed to relieve the stresses of contraction and expansion. This product allows for structural movement of up to 1/4" in drywall systems and is typically used in ceilings or partitions. Perfect for high humidity areas. The expansion control joint groove is protected by plastic tape that can be easily removed after the joint finishing material has dried, leaving a clean well-formed joint. Easy to cut with shears, knife or fine-tooth hacksaw and staples easily into place. The dent resistant strip has deeply knurled, perforated flanges for enhanced joint compound adhesion.

Product Data and Ordering Information

Material: Extruded rigid vinyl; contains no asbestos
 Dimensions: 0.093" (2.3mm) from face of wallboard
 Part Number: EZSVYL

Length	Pieces Per Carton	Cartons Per Pallet	Feet Per Carton
