2” x 2” Corner Right

2” x 2” Corner Right works very well at strengthening inside corners. Reinforce those inside corners prone to cracking by applying Corner Right to the inside corner. Phillips Corner Right is run at 100° so it will form to the inside corner giving a stronger and also a straight corner. Also works very well for reinforcing wall to ceiling corners. Will also reinforce other inside corner areas areas on a stucco job noted for cracking.
