2.5 Self-Furring V-Groove Diamond Mesh Lath

Self-Furring V-Groove Diamond Mesh Lath is manufactured with approximately 1/4" deep grooves and 5 grooves per sheet to ensure thorough plaster penetration and strong mechanical bond. V-Groove lath is easily shaped for curved or contoured surfaces like concrete, cement board, column fireproofing, masonry and replastering over old surfaces while maintaining consistent plaster depths and eliminating need for added furring strips.

Product Data and Ordering Information

| Material: | Hot-dipped galvanized |
| Part Number: | 25SLHDG8VG |
